

**ADCaster C1**  
Versatile Mini Integrated Audio Interface  
**User Manual**

**Interface**

Thanks for purchasing COMICA versatile mini integrated audio interface ADCaster C1

**Main Features**

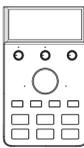

- 48kHz/24bit Record, Broadcast-level Sound Quality
- Mini and Lightweight, External Dual XLR Interfaces
- Support 3.5mm/XLR Multi Interfaces for DV/AV Mic Input
- Revolutionary ComMix™ Denoise Algorithm, Two-stage Denoise Mode
- Internal Bluetooth 5.3 Chipset, Advanced Bluetooth Connection
- Support Individual Mic Preamps, Monitor Volume and Output Gain Control
- Adjustable 3 EQ Modes, 3 Reverb Modes and 5 Voice Effects
- 6 Sound Packs to Create Live and Podcast Atmosphere
- Support One-click Loopback/Out/Mute and Monitoring
- Built-in Rechargeable Lithium Battery, Operating Time Up to 7 Hours
- Touch-sensitive Panel Design, Flexible and Visible Operation

**Notice**

- When working with other products which have high sensitivity, it is recommended to adjust the gain of ADCaster C1 to the minimum before turning it on. Users can then adjust the gain step by step to avoid sound peak or audio feedback.
- When connecting mics not requiring 48V phantom power, please make sure to turn off 48V phantom power to avoid damaging the mics.
- Before connecting/disconnecting the microphones, please turn off the 48V phantom power to avoid damaging the devices.
- Please read this user manual thoroughly before using the product, and keep it for future reference.
- Please do not expose the product to rain or moisture, and avoid having water or other liquids spilled on it.
- Please do not use or store the product near any heat sources such as radiators, stoves, or other heat-producing appliances.
- This product is a high-precision product, please prevent it from dropping or colliding.

**Packing List**

Main Part:

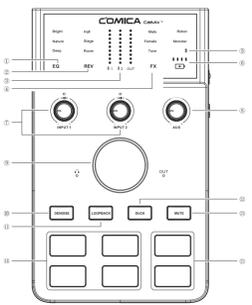

ADCaster C1

Accessories:

- 2 in 1 Audio Cable
- USB C-XLR/RS Audio Cable
- 3.5mm TRS/TRRS Audio Cable
- Charging Cable
- Sound Pad Template
- User Manual
- Warranty Card

**Components and Instruction**

1. EQ Switch Button  
Short touch to switch Bright/Normal/Deep three EQ modes, the corresponding indicator shows blue; Long press to turn off EQ modes, and the corresponding indicator turns off

2. REV Switch Button  
Short touch to switch Hall/Stage/Room three REV effects, the corresponding indicator shows blue; Long press to turn off REV effects, and the corresponding indicator turns off

3. Audio Dynamic Indicators  
Show the audio dynamic of mic 1/2 Input volume and interface output volume. More glowing indicators means higher volume (1-6 indicators show blue and 7-9 indicators show orange)

4. FX Switch Button  
Short touch to switch Male/Female/Tune/Robot/Monster five FX effects, the corresponding indicator shows blue; Long press to turn off FX effects, and the corresponding indicator turns off

5. Bluetooth Indicator  
The indicator is off when Bluetooth is off; the indicator blinks blue when Bluetooth is on and unpaired; the indicator shows blue when paired

6. Power Status Indicators  
There are four power indicator lights, one of which represents 25% of the power. The first indicator blinks blue when battery is low; the indicator blinks blue one by one while charging

7. Mic Gain Control Knob/48V Phantom Power Button  
Turn to adjust gain of mic1/2; press to turn on/off the 48V phantom power of XLR mic1/2. The indicator shows blue when the power is on

8. AUX Input Volume Control Knob  
Turn to adjust volume of background music input with Bluetooth and AUX connection

9. Monitor/Output Volume Switch&Control Knob  
Press to switch monitor/output volume control, the corresponding indicator shows blue; turn to adjust monitor/output volume

10. Denoise: Short press to turn on/watch/turn off denoise. The indicator shows white when the first-stage denoise is on, and shows orange when the second-stage denoise is on. Denoise automatically filters background noise, and ensures the clearness of audio recording

11. Loopback: Short press to turn on/off; Loopback: the indicator turns on/off when Loopback is on/off. Turning on Loopback will allow the ADCaster C1 to record the system audio from the USB C input. If turned off, you can still hear the system audio from monitoring, but it will not be recorded

12. Duck: Short press to turn on/off; Duck: the indicator turns on/off when Duck is on/off. Duck mode can be activated to lower the volume of background music and turn up the host's voice

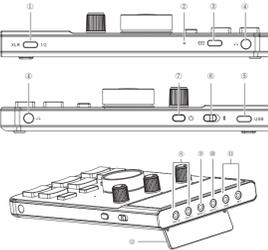

13. Mute: Short press to turn on/off; Mute: the indicator turns on/off when Mute is on/off

14. Audio Effect Button  
Short press to turn on/off audio effects; the corresponding indicator turns on/off when audio effect is on/off; ADCaster C1 has 4 preset audio effects including Applause, Laughter, Cheering, Funny

15. Custom Audio Effect Button  
Users can record songs, music, beats via mics, external audio input devices, Bluetooth devices, and save it to ADCaster C1

- Recording: with ADCaster C1 on, connect it to microphone/audio input devices/Bluetooth devices; Long press the custom button until the indicator shows cyan and enters recording mode. The longest recording time is 10 seconds; Short press to stop recording
- Delete recording: Repeat the recording steps and the new recording will replace the old one
- Play customized audio: Short press the custom button with existing customized audio to playback audio; the indicator turns on/off when audio playing is on/off

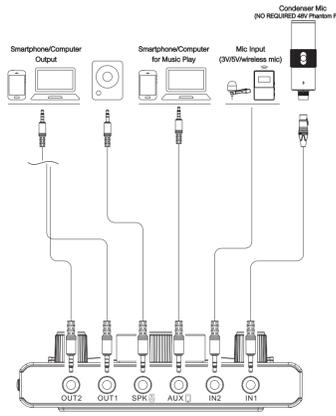

By default, there is no customized audio effect

- XLR1/2: Connect XLR mics to get mic input via the USB C-XLR/RS audio cable
- Reset Hole: If the device cannot be charged or is unable to work, insert the reset pin into the reset hole to reset it
- USB-C Charging Port: Plug in the USB-C charging cable to connect ADCaster C1 and power bank/DC power to charge
- 3.5mm Monitoring Port: Plug in a 3.5mm TRS/TRRS headphone to monitor
- USB-C Port: Connect phones/computers to input/output audio signals
- Bluetooth Switch: Move to turn on/off Bluetooth
- Power Button: Long press to turn on/off ADCaster C1
- OUT1/2: 3.5mm TRS output port to connect phones, computers and tablets for audio signal output
- SPK: 3.5mm TRS output port to connect speakers for audio signal output
- AUX: 3.5mm TRS input port to connect computers, phones for external audio signal input
- IN1/2: 3.5mm TRS input port to connect mics for audio signal input
- Foldable Stand

**Installation and Usage**

**Devices Connection:**  
Users can connect the corresponding devices to ADCaster C1 referring to the following pictures

**1. Connect Microphones**  
Users can connect 3.5mm microphones to ADCaster C1 via the input ports IN1/2; Connect XLR microphones to ADCaster C1 via the input ports XLR1/2

- Please turn off the 48V phantom power before connecting/disconnect XLR mics to avoid damaging the device
- Please turn on the 48V phantom power when using mics powered by it; make sure to turn off the 48V phantom power when using mics not powered by it

**2. External Audio Input**

2.1 AUX Input  
Users can connect smartphones/computers to ADCaster C1 via the AUX port for audio signals input, adjust the volume level through the AUX input volume control knob

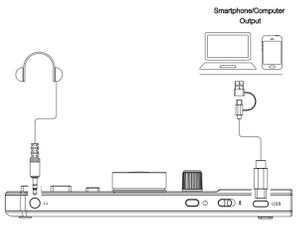

2.2 Bluetooth Input  
Users can connect smartphones/computers to ADCaster C1 via Bluetooth for audio signals input, adjust the volume level through the AUX input volume control knob

**Bluetooth Connection**

- Turn on the ADCaster C1 and move the Bluetooth switch to turn on Bluetooth. The Bluetooth indicator starts to flash
- Search for the device in the Bluetooth menu of the smartphone, find the Bluetooth device of "COMICA ADCaster C1"
- Please connect the smartphone to ADCaster C1 through Bluetooth and set up the music player on the smartphone in advance
- Open the live broadcast software on the smartphone/computer for live streaming

Bluetooth connection is limited by distance. Please do not place the smartphone too far away from the ADCaster C1 to avoid interference

**3. Connect Monitoring Headphones**  
Users can connect the TRS/TRRS headphones to the 3.5mm monitoring port1/2 of ADCaster C1, adjust the monitoring volume level through the monitor volume control knob

**4. Connect Monitoring Speakers**  
Users can connect monitoring speakers to the 3.5mm SPK output port of ADCaster C1 to output audio signals

**5. Connect Smartphone/Computers**  
Users can connect smartphones/computers to the USB-C or OUT1/2 outputs ports of ADCaster C1 to output audio signals

**DAW Software Setting:**  
When recording with Digital Audio Workshop, please follow the instructions below to set up (Take Cubase and Pro Tools as examples)

**Cubase**

- Please download and install the driver ASIO4ALL in advance
- Connect ADCaster C1 to the computer, open Cubase, and create a new project
- Click "Device - Device Setup", select "VST Audio System - ASIO4ALL v2"
- Click "ASIO4ALL v2 - Control Panel" to activate the "ADCaster C1" input/output port (click to lighten the power and play icons)

**ProTools**

- Please download and install the driver ASIO4ALL in advance
- Connect ADCaster C1 to the computer, open ProTools, and create a new project
- Click "Setup - Playback Engine", and choose "ASIO4ALL v2"
- Click "Setup - Hardware - ASIO4ALL v2 - Launch Setup App" to activate the "ADCaster C1" input/output port (click to lighten the power and play icons)

ADCaster C1 can't be found in the software, please make sure that ADCaster C1 is connected to the computer and open the sound settings in the computer to see if ADCaster C1 has been set as the default output device of the computer

**Specification**

Interface	
Input Interface	1 x USB-C to 2 x XLR, 2 x 3.5mm
AUX Input Interface	1 x 3.5mm, 1 x Bluetooth
Digital Interface	1 x USB-C
OUT Interface	2 x 3.5mm
SPK Output Interface	1 x 3.5mm
Headphone Output Interface	2 x 3.5mm

Audio Resolution	
Sampling Rate	48kHz
Bit Depth	24bit
Dynamic Range	100dB(A-weighted, as per IEC651)
Frequency Response	20Hz - 20kHz, ±0.1dB
THD+N	0.003%, 1kHz, -20dBFS, 20Hz/20kHz BPF
Equivalent Noise	-128dBu(A-weighted, as per IEC651)
Input Impedance	5kΩ
Microphone Input Maximum Level	6dBu
Preamp Gain Range	10dB - 60dB
Dynamic Range	100dB(A-weighted, as per IEC651)
Frequency Response	20Hz - 20kHz, ±1dB
Output Impedance	600Ω
Microphone Output Maximum Level	4dBu
Dynamic Range	120dB(A-weighted, as per IEC651)
Frequency Response	20Hz - 20kHz, ±1dB
Output Impedance	6Ω
Microphone Output Maximum Level	4dBu

Headphone Output	
Frequency Response	20Hz - 20kHz, ±1dB
Dynamic Range	100dB(A-weighted, as per IEC651)
Output Impedance	6Ω
Microphone Output Maximum Level	4dBu

Others	
Operating Time	With Phantom Power On: 4 Hours; With Phantom Power Off: 7 Hours
Charging Specification	USB-C 5V/2A
Phantom Power Output	48V
Net Weight	353g
Dimension	31 x 110 x 184mm
Working Temperature	0°C - 50°C
Storage Temperature	-20°C - 60°C
